

Your tattoo has been done under the strictest hygiene conditions by using new (single-use) or sterile tools which have been autoclaved (heat sterilized) to destroy all possible contaminants. It is your responsibility to ensure the tattoo heals under optimal conditions.

Seek medical attention immediately if you experience serious pain, redness, or swelling.

IMMEDIATE AFTERCARE Day the tattoo is done

- If your tattoo is wrapped by the artist, please carefully follow their instructions — glad wrap should be left on for no more than 1 hour
- Gently, rinse the tattoo under clean cold water
- Pat dry with a clean sterile wipe or towel
- Leave the tattoo clean and dry — avoid touching

ONGOING CARE After the scab has come off

- Keep the skin moisturised and avoid too much sunshine

IMPORTANT NOTE

- Infections can happen due to improper aftercare — Art + Body Creative Studio does not take responsibility for improper aftercare
- We offer a free touch up within 3 months from your initial receiving a tattoo from Art + Body Creative Studio

INITIAL HEALING First one to two weeks

- Reasonable amount of oozing plasma, bruising, swelling, redness and burning sensations are normal — pat the plasma dry with a clean disposable paper towel
- Keep the tattoo clean and dry all the time
- Keep covered with loose natural-fibre clothing to protect from dust and sun
- From the third day after getting the tattoo, gently apply tattoo aftercare cream or coconut oil sparingly once or twice — make sure the tattoo is completely dry before application
- Absolutely avoid surfing, hot pools, bath, swimming, sun bathing, rubbing, scratching, using harsh products, too much sunshine, and activities that produce excessive sweating
- If in doubt over any adverse reactions stop applying ANY product for 48 hours, and if concerned contact Art + Body Creative Studio
